PROactive PRONUNCIATION

# D to Voiceless “TH” Sentence Transition

The /d/ sound involves placing the tongue tip on the roof of the mouth just behind the front teeth on the alveolar ridge behind your top teeth. The tongue then must slide out and between the teeth to create the “th.” Feel how you will need to slide the tongue from the alveolar ridge over to between the teeth without releasing or letting go.

That was a wild theme park

Don’t forget to load the truck with apples

She wanted a bird-themed party

The neighbor said he would lend the tools to us for the shed

I need help to add these numbers together

I forgot I had these boxes here

My daughter made this book for you

There will be no mud throwing during recess

I read that book last year, it was great

My dad thinks his jokes are hilarious

He lied then he stole from us

That’s one very mad thug

The sad thing is that I can’t even remember it

If you end that game of monopoly, we can go out for ice cream

Did they win the baseball championship?
