PROactive PRONUNCIATION

“UH” /^/ Words

The “UH” /^/ sound is exactly the same as the “UH” in the schwa /ə/; only it is slightly longer, louder, and higher-pitched since it occurs in stressed syllables. Your meaning will be impacted if you tend to produce an /a/ “AH” sound instead of “UH.” So, “nut” will sound more like “not.” The fix is to keep your jaw in a neutral position and not open it as widely as you might with /a/ “AH.” Keep your tongue resting in the middle of your mouth.

Because “buh KUZ”	gum	son/sun
bug	hung	such
bump	much	thumb
club	mug	ugly
does	none/nun	uncle
doesn’t	of	under
duck	one/won	up
dumb	plunge	us
flood	pug	was
fudge	rub	wasn’t
fun	shut	young
